Importing a Lamborghini to Andorra: the complete 2026 guide

Do you dream of a **Lamborghini** and live in Andorra? Local supercar supply is very limited, and finding the exact model, colour and equipment you want is almost impossible without looking abroad. That's why more and more residents choose to **import their Lamborghini from Germany**, one of Europe's largest high-end car markets. In this guide we explain why it pays off, which models we import and what the process looks like.

Why import a Lamborghini to Andorra?

Germany has a large number of Lamborghinis for sale, many impeccably maintained and in configurations hard to find locally. Importing lets you **choose exactly the car you want** instead of settling for whatever is nearby. See the available Lamborghinis on our [Lamborghini in Andorra](#) page and our [guide to buying a car in Andorra](#)

Lamborghini models we import

We locate and import any Lamborghini you want. The most in-demand among Andorra residents are:

- [Lamborghini Urus](#): the brand's SUV, the most practical Lamborghini for daily use and the most sought-after.
- [Lamborghini Huracán](#): the V10 supercar, the entry point to the most passionate range.
- [Lamborghini Aventador](#): the V12 flagship, an icon for collectors.

How much does it cost to import a Lamborghini to Andorra?

The final price is the car's price in Germany plus import costs. Andorra's big advantage is its taxes:

- **4.5% IGI**, versus 21% VAT in Spain or 20% in France.
- Transport from Germany and Andorran registration procedures.

Since each unit's price depends on the model, year and condition, the best is to see the real offer: check the [Lamborghinis available to import](#) and we give you the **final, all-inclusive price**.

The import process step by step

Once you've chosen the Lamborghini, the process includes locating and inspecting the car in Germany, transport, customs, homologation, the technical inspection and registration with the Govern and the ACA. There is an **age rule** for vehicles imported to Andorra; we check each unit's eligibility before purchase.

Import the Lamborghini yourself or with an importer?

You can do it yourself, but the process involves several technical and administrative steps in another language, and with a car of this value every detail matters. As an importer, at Importocotxe we handle everything: locating the ideal Lamborghini, checking its condition and history, negotiation, transport and all Andorran registration.

Why import your Lamborghini with Importocotxe

With over 300 cars imported to Andorra, we know every step. We offer the search for the perfect Lamborghini in Germany, inspection, negotiation, transport and all Andorran registration, with a final fixed price and warranty included.

Frequently asked questions

Is it cheaper to import a Lamborghini than to buy it in Andorra?

It often pays off, thanks to the wide German-market supply and the 4.5% IGI, even including import costs. Plus you choose exactly the unit you want.

Which Lamborghini suits me?

It depends on your use: the Urus is the most versatile for daily driving, the Huracán the most accessible supercar in the range, and the Aventador the V12 flagship for those after a collector's piece.

Looking for a specific Lamborghini? Tell us the model, colour and budget you have in mind and we'll find it in Germany and import it to Andorra for you.
